## **1.1 Important information**

Every effort has been taken to ensure the accuracy of this document, however we do not accept responsibility for damage, injury, loss or expense resulting from errors and omissions, and we reserve the right of amendment without further notice.

**WARNING:** This product is not designed for use in, and should not be used for, medical applications.

The product doesn't guarantee safe power source disconnection, only functional switching of power is performed.

The product contains no serviceable parts, or internal adjustments. No attempt must be made to repair this product. Faulty units must be returned to supplier for repair. Improper use, disassembling or product modification causes warranty loss.

## 2 Introduction

IQsocket IQSW-GSML is a cost-optimized member of family of intelligent power sockets brought to you by IQtronic, Ltd, having reduced, but still useful set of features comparing with other members of the product family.

IQsocket IQSW-GSML allows you to control of any electric appliance connected to the device's socket remotely over GSM network. You can use for this purpose any mobile phone or even fixed-line telephone, simply by calling to, or by sending SMS to the number of SIM card inserted of your IQsocket IQSW-GSML.

**Output power socket:** Connect your electric appliance here. This socket is intelligent, can be controlled remotely.

**Power plug:** Input of AC power for product and also for connected appliance. Fits into electric socket/outlet.

**Microphone:** For listening of sound from surrounding environment.

**SIM socket:** Socket for SIM card. Push-push type.

**Push button:** For turning on/ off output power socket manually or resetting configuration to factory default values.

Besides controlling of the power, IQsocket IQSW-GSML is equipped with a choice of useful functions, including:

- Listening of sound from surrounding environment using integrated microphone by call (tapping)
- Sending SMS alert on power loss and restore
- Time scheduler function, allowing switching on/off your appliance based on day of week and time.

## 2.1 Product features

In general, IQsocket IQSW-GSML has following features:

- Controlling (turn on, turn off; turn on/off for a specified time; restart by cutting power for short time) of any electric appliance connected to the switched socket by SMS, by call or manually by pressing pushbutton on IQSW-GSML body
- Switching on/off your appliance automatically using scheduler function, based on day of week and time.
- Sending informational status SMS messages to user upon request or automatically on scheduled date/time.
- Providing status of switched socket by SMS upon SMS request
- Sending SMS alarm alert on power loss and restore
- Sending current values of user-configured IQSW-GSML parameters upon SMS request
- Configuring IQSW-GSML parameters simply by sending SMS commands
- Listening of sound from surrounding environment using integrated microphone by call (tapping)

### 3 Installation

Before starting installation, please read this manual and take into account Important information section at beginning of this manual.

#### 3.1 Inserting SIM Card

Prepare a standard size SIM card from your favorite GSM operator and insert it into SIM bay of your IQsocket IQSW-GSML:

Insert SIM card into the SIM bay and push it gently inside until you hear/feel a click, so it becomes locked inside bay.

To remove SIM from your IQsocket IQSW-GSML, gently push the SIM inside the bay until you feel and hear a click again; card will become unlocked and now pull it out of the bay.

#### **WARNING!**

*PIN authorization should be turned off before the SIM card is used in IQsocket IQSW-GSML*

Authorization can be turned off by inserting the SIM card into a GSM phone and disabling SIM PIN usage using appropriate command usually located in 'Settings' phone menu. Now you can remove the SIM card from phone and insert it into your IQsocket IQSW-GSML.

#### **Note...**

*It is highly recommended to delete all received SMS messages, stored on the SIM card before using it in IQsocket IQSW-GSML*

## 3.2 Wiring the IQsocket IQSW-GSML

Wiring is intuitive, simply connect your electric appliance into the device's socket and plug the IQSW-GSML into a free power socket.

**Controlled power socket:** Connect your electric appliance here.

**Power plug:** Plug the IQSW-GSML into an electrical socket.

### **Note...**

*Both the socket and the plug of the IQSW-GSML follow the same international standard and nominal voltage rating. Ensure you ordered proper international version of the IQSW-GSML suitable for your country*

### **WARNING!**

*Please respect maximum current rating of the socket - 16A for resistive load. Do not overload your IQSW-GSML to avoid damage or shortening life span of internal switching relay, which is not covered by warranty.*

### 3.3 Powering IQSW-GSML On

Once you plug your IQsocket IQSW-GSML into a live electric socket, it become powered on and starts operation.

You can verify it by observing status of the LEDs:

- Once AC power is connected, all three LED indicators will blink shortly and internal self-test is performed in about 10seconds. Then, if everything is ok, the Power LED will turn to solid Red.
- In case of active PIN authorization on the SIM card, GSM LED starts blinking fast (approx. three times per second).
- LINK/ACT (Green) starts to blink slowly (approx. every three seconds), once device has been successfully logged into a GSM network. If the LINK/ACT blinks about every second, searching of GSM network is in progress.
- The Output LED (Yellow) indicates state of output socket. Shining LED means socket is active – appliance plugged into the output socket is operating and vice versa. Blinking LED (approx. every two seconds) indicates startup delay in progress - the output socket has been set to on state but will be physically turned on after passing 30 seconds delay since device startup.

Please see chapter 5 for more information on LED indicators.

Your IQSW-GSML is now ready for use.

## 4 Managing IQSW-GSML

This chapter guides you through management commands and features of IQSW-GSML.

### 4.1 Managing by SMS

Commands are send in form of SMS messages to call number of SIM card inserted into your device. Messages have following syntax:

**pinCOMMAND** (e.g. *3366STATUS*)

- With pre-configured security password by command *SMSPIN=3366*

**COMMAND** (e.g. *STATUS*)

- with un-configured security password/*SMSPIN*

There are two kinds of commands:

**Control commands** (labeled as Ctrl in tables)

- Used to control of the IQSW-GSML and can be used at any time. Security settings, such as *SMSPIN*, permitted callers list, **DO** apply.

**Configuration commands** (labeled as Cfg in tables)

- Allows to configure the IQSW-GSML parameters and functions. Security settings, such as *SMSPIN*, permitted callers list, **DO NOT** apply – instead, as a security measure, configuration commands are accepted only in configuration mode.
- Configuration mode can be activated by using *CONFIG* command. Notice *CONFIG* is a Ctrl-class command hence protected by your security settings. Configuration mode is automatically deactivated after 10 minutes since last configuration command has been received.
- When a configuration command has been issued while configuration mode is not active/already expired, error message “Timed Out!” will be replied to the sender. See also chapters 4.7 and 0 for more information about error messages.

Each command is normally confirmed by a response SMS sent back to the command sender number. In case of an error is detected in a command, IQSW-GSML will respond with error message to the sender. Sending response and error SMS messages can be disabled. See also chapters 4.7 and 0 for more information about error messages.

Case of commands is ignored; *STATUS* or *sTaTUS* is the same command. All incoming SMS messages longer than 30 characters or messages containing space and dot characters are being deleted without any error response.

SMS Command	Description	SMS Response	Type
TURNOFF	Turn the output socket off.	TurnedOff	Ctrl
TURNON	Turn the output socket on.	TurnedOn	Ctrl
TURNOFF=123	Turn the output socket off for 123 minutes. Maximum acceptable value is 180 minutes.	TurnedOff 123 min	Ctrl
TURNON=123	Turn the output socket on for 123 minutes. Maximum acceptable value is 180 minutes.	TurnedOn 123 min	Ctrl
RESTART	Change (negate) state of the output socket for time preconfigured by command RESTARTTIME.	Restarted	Ctrl
STATUS	Get status of IQsocket IQSW-GSML: Output socket, current date/time, GSM signal level and last power lost event.	Output:OFF, Time:yy/mm/dd, hh:mm:ss, Signal:76%, Last PWR Lost: yy/mm/dd, hh:mm:ss	Ctrl
RINGON	A call-back to the sender's number will be made. Useful to keep-alive of credit in prepaid SIM cards.		Ctrl

If a power failure occurs during *TURNON=123/ TURNOFF=123* commands, time of power failure is not included in the countdown, so e.g. you need to run an appliance for a hour issuing *TURNON=60* command, but AC power is lost after 30minutes and restored back say after 2hours, appliance will be running for half an hour after power is restored back.

**Note...**

*Please note output socket is physically turned to the on state only after passing 30 seconds startup delay since device has been powered on. This is indicated by slow blinking (approx every two seconds) of the output LED indicator (yellow).*

## 4.2 Managing by phone call

The output socket of IQSW-GSML can be also controlled by dialing/ringing up the number of its SIM card. Call is for most commands rejected by IQSW-GSML so its use is free of charge, with exception for listening sounds using embedded Microphone.

Behavior of IQSW-GSML to incoming calls must be configured in advance using RING command per following table.

SMS Command	Description	SMS Response	Type
RING=NOACTION	No action is performed, call is rejected.	RING=NOACTION - OK	Cfg
RING=RESTART	Change (negate) state of output socket for time preconfigured by command RESTARTTIME, call is rejected.	RING=RESTART - OK	Cfg
RING=SWITCH	Change (negate) state of output socket, call is rejected.	RING=SWITCH - OK	Cfg
RING=MIC	Listening of sound in surrounding environment via integrated microphone for one minute, call is answered.	RING=MIC - OK	Cfg
RING?	Get current configuration of RING action, active setting is in () parentheses.	RING=(NOACTION), RESTART, SWITCH, MIC	Cfg

### 4.3 Manual Control

IQSW-GSML can be also controlled manually using push button located near to the SIM bay, see drawing in section 1. Operate button using a suitable narrow tool, e.g. a pen.

- Control of the output socket: Short pressing of the push button will change (negate) state of the output socket.
- Reset to default settings, by pressing for more than 5 seconds, please see chapter 6.1 for more information

#### **Note...**

*Manual control by pressing of the push button become active after 30 seconds since IQsocket IQSW-GSML is powered on. SIM card must be inserted in the SIM bay.*

### 4.4 Timing setup

Following table summarizes settings of time interval of *RESTART* command.

SMS Command	Description	SMS Response	Type
RESTARTTIME=XX	Configures time of RESTART command. Range is 1 to 180 seconds.	RESTARTTIME=XX - OK	Cfg
RESTARTTIME?	Get current configuration of RESTARTTIME parameter.	RESTARTTIME=10 seconds	Cfg

## 4.5 Date/Time setup

There are three ways of date/time setup:

- Automatic setup of time from the GSM network, when particular operator and SIM card support such feature.
- Manual setup based on time stamp of incoming SMS message
- Manual setup using *DATE=* command. Enter target time in following format: *DATE=yy/mm/dd,hh:mm:ss+zz* where *zz* is Time zone, with either + or - sign.

SMS Command	Description	SMS Response	Type
DATE	Date/time is set from timestamp of incoming SMS message.	DATE yy/mm/dd,hh:mm:ss+zz - OK	Cfg
DATE=yy/mm/dd,hh:mm:ss+zz	Set Date/time manually.	DATE=yy/mm/dd,hh:mm:ss+zz - OK	Cfg
DATE?	Get current settings of Date/time.	DATE yy/mm/dd,hh:mm:ss+zz - OK	Cfg

## 4.6 Security features

IQsocket IQSW-GSML is equipped with advanced authorization features to avoid controlling by unauthorized users. The security features include:

- Allowing control only from authorized phone numbers
- Authentication of each SMS command by PIN code (SMSPIN)

Both features can be used simultaneously.

In case of using authorized numbers list, device will ignore all SMS messages and calls received from numbers not included in the permitted phone numbers list. If this security feature is not enabled, device can be controlled by anyone who knows number associated with inserted SIM card (and SMS pin in case PIN code protection is also active).

IQsocket IQSW-GSML allows defining up to 20 permitted phone numbers, each containing up to 15 numerals.

In case of using SMSPIN, right before each SMS command is placed PIN code without any space or special character, as shown here:

pinCOMMAND (e.g. 3366STATUS)

Command will be accepted only when entered PIN code matches with the code predefined by *SMSPIN* command.

**Note...**

*Pin code (SMSPIN) is having no relation with SIM card PIN code. It is just a password called SMSPIN and used by IQsocket IQSW-GSML for SMS message authentication, having the same structure as standard PIN = 4 numbers.*

Security settings can be configured and viewed simply by following commands.

SMS Command	Description	SMS Response	Type
SECNUMBER=NO	Security using permitted phone numbers list is turned off/inactive.	SECNUMBER=NO - OK	Cfg
SECNUMBER=YES	Security using permitted phone numbers list is turned on/active.	SECNUMBER=YES - OK	Cfg
SECNUMBER?	Get current configuration of SECNUMBER parameter.	SECNUMBER=(NO),YES	Cfg
SECNUMBER+421233355777	Add new number to security list.	SECNUMBER+421233355777 - OK	Cfg
SECNUMBER-421233355777	Delete specific number from permitted phone numbers list.	SECNUMBER-421233355777 - OK	Cfg
SECNUMBER-ALL	Delete all numbers from permitted phone numbers list.	SECNUMBER-ALL - OK	Cfg
SECNUMBER=LIST	Get dump of permitted phone numbers list.	LIST 421903123456,421903111222,421235678235 Or LIST - NO NUMBER!	Cfg
SMSPIN=1234	Configuration of SMS password/SMSPIN.	SMSPIN=1234 - OK	Cfg
SMSPIN=NOPIN	Using of password/SMSPIN is deactivated.	SMSPIN=NOPIN - OK	Cfg
SMSPIN?	Get configuration of SMSPIN parameter.	SMSPIN=(NOPIN), 1234	Cfg

Permitted phone numbers list accept up to 20 numbers, must contain only numbers in international format, without spaces or other characters, max. 15 numerals long:

Example: *SECNUMBER+421265440655* means add number +421-2-65440655  
 Example: *SECNUMBER-421265440655* means delete number +421-2-65440655. 421 is country code in this example and 2 is area code.

## 4.7 Response messages settings

When you communicate with your IQsocket IQSW-GSML, it is important to make you sure if command was understood and executed successfully. For this purpose we implemented response messages, confirming each command or informing you when an error is detected. In case of SMS commands, you will be notified by back SMS response message. If you manage your IQsocket IQSW-GSML by phone call, your command will be confirmed by back phone call to your phone number. Note it is not supposed you will answer such back call, you can simply reject it.

Commands for response messages settings are summarized in following table:

SMS Command	Description	SMS Response	Type
SMSCONFIRM=YES	SMS confirmation is enabled/active for all SMS commands.	SMSCONFIRM=YES - OK	Cfg
SMSCONFIRM=NO	SMS confirmation is disabled/inactive for all SMS commands.	SMSCONFIRM=NO - OK	Cfg
SMSCONFIRM?	Get configuration of SMSCONFIRM parameter, active setting is in () parentheses.	SMSCONFIRM=NO,(YES)	Cfg
SMSCONFIRMUNAUTH=YES	SMS confirmation for SMS control commands is active also for unauthorized numbers.	SMSCONFIRMUNAUTH=YES - OK	Cfg
SMSCONFIRMUNAUTH=NO	SMS confirmation for SMS control commands is not active for unauthorized numbers.	SMSCONFIRMUNAUTH=NO - OK	Cfg
RINGCONFIRM=YES	Phone call confirmation is turned on for all commands. Hang off after 10 seconds.	RINGCONFIRM=YES - OK	Cfg
RINGCONFIRM=NO	Phone call confirmation is turned off for all commands.	RINGCONFIRM=NO - OK	Cfg
RINGCONFIRM?	Get configuration of RINGCONFIRM parameter, active setting is in () parentheses.	RINGCONFIRM=(OFF),ON	Cfg
ERRORREPLY=YES	Sending error SMS messages is enabled/active.	ERRORREPLY=YES- OK	Cfg
ERRORREPLY=NO	Sending error SMS messages is disabled/inactive.	ERRORREPLY=NO- OK	Cfg
ERRORREPLY?	Get configuration of ERRORREPLY parameter, active setting is in () parentheses.	ERRORREPLY=NO,(YES)	Cfg

### Note...

*When RINGCONFIRM=YES command is used, confirmation back calls are only realized for SIM cards with active CLIP service.*

## 4.8 Scheduler feature

Your IQsocket IQSW-GSML is equipped with a scheduler, allowing to control output socket and to get status message, based on time and day of week. Up to 20 scheduled tasks are supported.

Following table summarizes usage of *SCHEDULER* command.

SMS Command	Description	SMS Response	Type
SCHEDULER+hh:mm, ,DOW,ACTION	Insert scheduler record to execute particular ACTION at time hh:mm every day of week DOW.	SCHEDULER+hh:mm, DOW,ACTION - OK	Ctrl
SCHEDULER-hh:mm	Remove scheduler record for particular time hh:mm.	SCHEDULER-hh:mm - OK	Ctrl
SCHEDULER?	Get list of all scheduler records.	hh:mm,DOW,ACTION	Ctrl

Where:

**hh:mm** denotes hour and minute of time in 24h format.

**DOW** denotes day of week.

Days of week numbers are recognized as follows:

**1- Monday, 2-Tuesday, 3-Wednesday, 4 Thursday, 5-Friday, 6-Saturday, 7- Sunday**

If "\*" symbol is inserted, action will be executed daily. If number of day within week is inserted, action will be executed only in the particular day of week.

Possible **actions** are:

- **ON** for turning the output socket on (same as TURNON command)
- **OFF** for turning the output socket off (same as TURNOFF command)
- **RES** for restarting the output socket (same as RESTART command)
- **INF**, to send *STATUS* message by SMS to number preconfigured by the *PWRALARMNUMBER* command (e.g. *PWRALARMNUMBER+421903123456*, see chapter 4.9.1 **Error! Reference source not found.**)
- 

Example of SCHEDULER? command output (four actions were recorded):

- 11:00,\*,ON Turn the output socket on every day at 11:00
- 14:30,\*,OFF Turn turning the output socket off every day at 14:30
- 01:30,1,RES Restart the output socket every Monday at 01:30
- 19:00,5,INF Send Status SMS every Friday at 19:00

## 4.9 Power lost alarm

The IQsocket IQSW-GSML is equipped with Power lost alarm feature, which can send an SMS alert to preconfigured number in case of mains power is lost and restored back.

Following table summarizes commands relevant to this feature:

SMS Command	Description	SMS Response	Type
PWRALARM=NOALARM	Power alarm on power lost event is not active.	PWRALARM =NOALARM - OK	Cfg
PWRALARM=LASTNUMBER	On power lost event, sends SMS alert to the number detected from the last incoming SMS.	PWRALARM = LASTNUMBER - OK	Cfg
PWRALARM=USERDEFINED	On power lost event, sends SMS alert to the number preconfigured by PWRALARMNUMBER.	PWRALARM = USERDEFINED - OK	Cfg
PWRALARM?	Get configuration of PWRALARM, active setting is in () parentheses.	PWRALARM =(NOALARM), LASTNUMBER, USERDEFINED	Cfg

SMS Command	Description	SMS Response	Type
PWRRESTOREALARM=NO	Power alarm on power restored event is not active.	PWRRESTOREALARM =NO - OK	Cfg
PWRRESTOREALARM=YES	Power alarm on power restore is active.	PWRRESTOREALARM = YES - OK	Cfg
PWRRESTOREALARM?	Get configuration of PWRRESTOREALARM, active setting is in () parentheses.	PWRRESTOREALARM =(NO),YES	Cfg

### 4.9.1 Defining phone number where to send alarm alerts

Command *PWRALARMNUMBER* allows to specify the phone number, where will be sent alerts in case of a Power lost alarm occurs.

Following table summarizes its usage:

SMS Command	Description	SMS Response	Type
PWRALARMNUMBER +420123456789	Define number for sending Power lost alarm SMS alerts.	PWRALARMNUMBER +420123456789- OK	Cfg
PWRALARMNUMBER?	Get current value of PWRALARMNUMBER.	PWRALARMNUMBER =420123456789	Cfg

### 4.9.2 SMS alarm alerts

IQsocket IQSW-GSML allows you to customize format of SMS alerts that are sent when power lost alarms occur.

Alerts are having following content:

*GSM Socket: PWR failed!*

*GSM Socket: PWR restored!*

Where text "GSM Socket" can be customized by user via *DEVICENAME* command:

SMS Command	Description	SMS Response	Type
DEVICENAME=my cottage	Set device name to value "my cottage". Custom name can be up to 15 characters long.	DEVICENAME=my cottage -OK	Cfg
DEVICENAME?	Get current settings of device name	DEVICENAME=my cottage	Cfg

### 4.9.3 Power lost event log

Up to 5 (five) last Power lost alarm events are stored in internal event log. Oldest record is then rewritten by the actual one. Events are recorded automatically when date/time is successfully obtained from the GSM network; other settings don't have influence to events recording process.

SMS Command	Description	SMS Response	Type
SHOWPWRLOG	Get all stored power lost events.	No record	Ctrl

## 4.10 Using microphone

Your IQSW-GSML is equipped with a highly sensitive microphone, which can be used to monitor sound through any phone. Sensitivity is typically sufficient to recognize voices within even larger room where is IQSW-GSML installed; it depends on device orientation and placement and also on background noise.

Microphone is activated by calling the number of your IQSW-GSML, while *RING=MIC* setting is preconfigured (see chapter 4.2)

**WARNING!**

*Please respect privacy and local law regarding to tapping, especially when monitored subjects are not informed about it. It is your sole responsibility how you will use it.*

### 4.11 Various other settings

SMS Command	Description	SMS Response	Type
CONFIG	Activate configuration mode. Automatically deactivated 10minutes after last configuration command that have been received.	CONFIG, OK	Ctrl
OUTPUT=REMEMBER	When powered on/power restored, output socket state will be returned to the same state as it was at time of disconnecting power /power lost.	OUTPUT=REMEMBER- OK	Cfg
OUTPUT=OFF	When powered on/power restored, output socket state will be set to OFF, regardless of state that was at time of disconnecting power /power lost.	OUTPUT=OFF- OK	Cfg
OUTPUT=ON	When powered on/power restored, output socket state will be set to ON, regardless of state that was at time of disconnecting power /power lost.	OUTPUT=ON- OK	Cfg
OUTPUT?	Get configuration of OUTPUT parameter, active setting is in () parentheses.	OUTPUT =(REMEMBER),OFF,ON	Cfg
HELP	Get list of all commands as help		Ctrl
LANG=EN	Switch language version	LANG=EN- OK	Cfg
LANG?	Get current language version, active setting is in () parentheses.	LANG=(EN), CZ	Cfg
VERSION	Get firmware version	Ver. 1.0.0 (c)2011	Ctrl

**Note...**

*Please note firmware of IQsocket IQSW-GSML can be upgraded only by sending unit back to the factory or to an authorized service center.*

## 4.12 Error messages

Error messages are being sent only when sending response messages is permitted (see also *ERRORREPLY* command).

<b>SMS response</b>	<b>Description</b>
Error!	Incorrect control or configuration command; or wrong SMSPIN.
Not allowed!	In case of permitted phone numbers list is active but used number is not included in it.
Timeout!	10 minutes interval of configuration mode has expired. In order to continue using configuration commands, please enter <i>CONFIG</i> command again.
Full memory!	Memory for storing permitted phone numbers is full.
No record	When trying to delete non-existing records, e.g. scheduled tasks, power lost event log.

## 5 Indicators

The IQsocket IQSW-GSML is equipped with three LED indicators:

### POWER

LIGHTS RED  
BLINKS RED 2 x PER SECOND

Input power is OK;  
SIM is not correctly inserted or missing or is bad

### LINK/ACT

BLINKS GREEN, EACH 3 SECONDS  
BLINKING GREEN EACH SECOND  
LIGHTS GREEN 2 x PER SECOND

Logged to GSM network  
Not logged to GSM network yet, searching  
SIM card have active PIN protection, use a GSM  
phone to disable it.

### OUTPUT

NOT ACTIVE  
LIGHTS YELLOW  
BLINKS YELLOW EACH SECOND  
BLINKS YELLOW EACH 2 SECONDS

Output socket is OFF  
Output socket is ON  
Hardware error/failure  
The output socket has been set to on state but will be  
physically turned on after passing 30 seconds since  
device has been powered on.

## 6 Factory default settings

Each device come from factory preconfigured with factory default values. Device can be anytime returned back to these default values by using reset to factory defaults procedure.

### 6.1 Reset to factory default procedure

Reset is done by pushing the push button located near to the SIM card bay. See also chapter 4.3.

In order to restore factory default configuration, push the button for at least 5 seconds and then release. All LED indicators should start blinking for next 10 seconds. Please press the button again within these 10 seconds to confirm reset to factory default procedure. After this step is your device in original factory configuration.

#### **WARNING!**

*Please BE CAREFULL! This step will erase all settings of your IQsocket IQSW-GSML except language settings.*

### 6.2 Factory default settings

Parameter	Default setting
RING	NOACTION
RESTARTTIME	10
RINGONTIME	30
SMSPIN	NOPIN
SECNUMBER	NO
SMSCONFIRM	YES
SMSCONFIRMUNAUTH	YES
RINGCONFIRM	NO
ERRORREPLY	YES
OUTPUT	REMEMBER
PWRALARM	NOALARM
PWRRESTOREALARM	NO

## 7 Technical specification

<b>Model</b>	IQsocket IQSW-GSML-E, CEE 7/5 French type socket IQsocket IQSW-GSML-F, CEE 7/4 "Schuko" earthed IQsocket IQSW-GSML-N, NEMA 5-15 USA socket IQsocket IQSW-GSML-B British BS 1363
<b>Mains power</b>	100-230VAC / 50-60Hz, own consumption avg. 20mA@230V
<b>Output socket load</b>	16A
<b>Management</b>	Via SMS messages
<b>Security</b>	PIN code protected commands Permitted phone numbers list
<b>GSM</b>	EGSM900, GSM850 Class4 (2W) DCS1800, PCS1900 Class1 (1W) SIM card Plug-in 3V
<b>Antenna</b>	Integrated antenna (standard models) External 2dBi via SMA-F connector ("+" models)
<b>Indicators</b>	POWER: red LED GSM: green LED RELAY: yellow LED
<b>Features</b>	Appliance control over SMS, by call or manually Remote restart of appliances Scheduler Power lost alarm w/ SMS alert Monitoring of sound using integrated microphone
<b>Dimensions</b>	(LxWxH) 140 x 65 x 55mm(92mm w/ plug)
<b>Weight</b>	0.2kg netto
<b>Operating temperature</b>	0 to +50 °C
<b>Humidity</b>	Max. 80%, non-condensing
<b>Operating temperature</b>	0 to +50 °C
<b>Environment protection</b>	IP40, for normal environment
<b>Installation category</b>	Class II, overvoltage max. 2500V
<b>Compliance</b>	CE, FCC

## 7.1 Operation, maintenance and safety recommendations

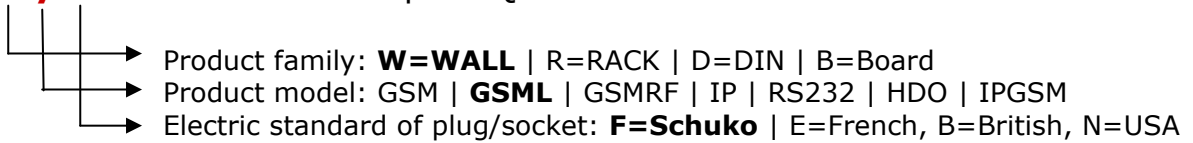

- Do not modify product in any way and do not operate product modified any way. Warranty is void when product was disassembled or modified in any way.
- Product is not fused; ensure it is installed in fused electric installation only.
- Product can be operated only indoor office/house environment. Do not expose it to humid, wet nor chemically aggressive environment.
- Product is not designed for industrial operation with aggressive environment.
- Before use, please check, if mobile phones can be used in the area. If not, please don't put product into operation, it can have negative influence to other electronic systems.
- Don't expose product to vibrations, shaking or fall downs to avoid product damage.
- When use sound monitoring for taping purposes, ensure you have prior permission to do it from affected people.
- Maximum load current of the socket is 16A. If you need to switch higher current load, use an external contactor rated for target load. Switching higher than nominal rating currents and/or loads with severe inductive/capacitive character with high startup currents can cause permanent damage of switching elements, which is not covered by warranty.
- Before using a SIM card, ensure all received SMS messages stored on the card are deleted.
- Product is not a toy for children, SIM card represents a small part that can be easily ingested.
- **WARNING:** This product is not designed for use in, and should not be used for, medical applications.

## 8 Ordering and accessories

IQsocket product family uses following ordering code system:

**IQSx-y-z**

Example: IQSW-GSML-F

### Ordering code

Code	Description
IQSW-GSML-X	standard version, pls specify socket type in place of X
IQSW-GSML-X+	version with external antenna (included in package)

Photo of a IQSW-GSML with external antenna:
